END USER LICENSE AGREEMENT

PLEASE READ THIS SOFTWARE LICENSE AGREEMENT ("LICENSE") CAREFULLY BEFORE INSTALLING THE SOFTWARE. IT PROVIDES THE TERMS OF THIS LICENSE. WHILE INSTALLING THE SOFTWARE, THIS SOFTWARE LICENSE AGREEMENT WILL BE DISPLAYED. BY CLICKING ON THE "Yes" BUTTON, YOU ARE CONSENTING TO BE BOUND BY THIS AGREEMENT. FOLLOW THE DIRECTIONS ON THE SCREEN AND COMPLETE THE INSTALLATION PROCESS.

IF YOU DO NOT AGREE TO ALL OF THE TERMS OF THIS AGREEMENT, CLICK THE "No" BUTTON. THE INSTALLATION PROCESS WILL NOT CONTINUE.

NEC Viewtechnology,Ltd."NECVT") grants you ("User") a license to use the NEC PROJECTOR USER SUPPORTWARE ("Software") provided with this End User License Agreement ("EULA"). User assumes responsibility for the selection, adoption use and the result of use of the Software to achieve its intended result.

1. Term
1) EULA will become effective upon User’s agreement to the terms of EULA and shall remain in force until User terminates it by returning or destroying the Software and its related documents.

2) Notwithstanding the foregoing NECVT may terminate EULA at any time upon User failing to abide by any terms of EULA. Upon the termination of the EULA by NECVT, the license granted to User shall be terminated automatically. User agrees to destroy the Software together with all copies of it upon such termination.

2. License
User use the Software on personal computers only for operating NECVT’s projector supplied with the Software or other projector to be specified by NECVT ("Projector")

3. Replication, modification and merger of the Software
1) User may make copies of the Software and related documentation to the extent necessary for using the Projector. User agrees to reproduce the NECVT’s copyright notice and other notice on any such copies.

2) User may not use, copy, modify, or otherwise dispose of the Software, except as expressly permitted in EULA.

3) No provision in EULA shall be construed to assign and/or transfer any intellectual property right in the Software to User.
4. Transfer of the Software

1) User may transfer the Software to any third party, provided always that:
   a) User must transfer, with the Software, to such third party EULA and all the related
c      documentation with all copies thereof, and must not retain any copy thereof.
   b) Such third party has agreed to the terms and conditions of EULA.
2) Except as otherwise expressly permitted above, User may not sublicense, assign, transfer
   or otherwise dispose of the license for the Software.

5. Reverse Engineering

User may not reverse engineer, decompile, and/or disassemble the Software, except and
only to the extent that such activity is expressly permitted by applicable law notwithstanding
this limitation.

6. Limitations of Warranty

1) Except as expressly specified herein, the Software is provided "as is" without warranty of any
kind, including but not limited to implied warranties for fitness for a particular purpose, mer-
chantability, title and non-infringement of any third party rights.
2) If User finds a material defect, which effects to the proper operation of the Software, in the
media of the Software, NECVT will replace such defective media at no charge, if such media
is returned to distributor from which such User purchased it within 1 month from such pur-
chase and if NECVT determines that such defect is due to NECVT.

7. Limitations of Liability

In no event shall NECVT be responsible for any indirect, consequential or special damages
or lost profits even if NECVT has been advised of the possibility of such damages, and/or for
any claim for compensation or damage by any third party to User.

8. Others

1) The validity, interpretation, construction and performance of EULA shall be governed by the
laws of Japan.
2) User shall not export the Software to any country to which such export would be prohibited
   by any applicable laws.
1. Introduction

Thank you for your purchase of the NEC projector (hereafter referred to as "unit" or "projector").

This projector is connected to a personal computer or other equipment and clearly projects text or graphics to a screen.

This projector is supplied with convenient software that allows presentations to be made more simply and effectively. This guide gives an overview and describes the use of the accompanying software (contained in the CD-ROM that is supplied with this projector). Look over this guide in conjunction with the Help functions of the software programs.

■ Contents of the Supplied CD-ROM

The supplied CD-ROM contains the following software programs:

- Dynamic Image Utility 2.0
- Viewer PPT Converter 2.0
- Image Express Utility 1.0

Please see the Help functions of the software programs for information about their functions and operation.

■ What Can Be Accomplished with the Supplied Software

Dynamic Image Utility 2.0

- Converts PowerPoint files, JPEG images, and other files and creates slides that can be displayed with the viewer function of the projector.
- Captures portions of the image from the screens of word processors, spreadsheets, browsers, and other programs for use in presentations.
- By saving the created slides on a flash memory card (*1) and inserting the card into the PC Card slot of the projector, the slides can be projected to the screen without connecting a personal computer.
- The connection of personal computers and projectors by means of a network environment (*2) or connection with USB cable (*3) or serial cable allows the following uses. (In a network environment or USB cable connection (*3), support of multiple units is permitted.)
  (1) Images and slides can be sent from the personal computer to the projector and then projected to the screen. When using Microsoft PowerPoint 2000/2002/2003, slides can be sent synchronized with the slide show page feed.
  (2) A personal computer can be used to switch the projector power on/off, control the adjustment of image quality and other settings, and to display the remaining lamp life.
Viewer PPT Converter 2.0
- Converts files created with Microsoft PowerPoint 95/97/2000/2002/2003 to an independent index format with a simple operation to enable direct playback with the viewer function of the projector.
- When using Microsoft PowerPoint 2000/2002/2003, Viewer PPT Converter 2.0 can be started from PowerPoint (by means of add-in registration to PowerPoint).

Image Express Utility 1.0
- Using a network environment (*2), this program enables the screen image displayed by the personal computer to be sent to the projector and then projected to a screen.
- Two methods are available for sending the screen image to the projector. "Continuous Transmit" automatically sends the screen image of the personal computer at a fixed interval. "Single Frame Transmit" sends the screen image by clicking the screen button (or pressing a key).

*1: Please purchase a commercially available PCMCIA Type 2 (ATA specification) flash memory card.
*2: Please check the network environment on page 6.
*3: USB cable connection is not supported by the LT260, LT240, LT220 and VT770.

**Information about Upgrading this Software**
Please see the service page for NEC projectors (http://www.nec-pj.com/) for information about software upgrades of NEC Projector User Supportware (i.e., Dynamic Image Utility, Viewer PPT Converter, and Image Express Utility).
### Projector "Easy Connection" Settings

The "Easy Connection" option is a mode that can abbreviate the troublesome LAN settings when using the Image Express Utility and connecting the PC and projector via a wireless LAN.

- From the Advanced menu, select [Projector Options]→[LAN Mode]→[Network Type]→[Mode]→[Easy Connection] on the projector (except the GT6000/GT5000). (No setting for IP address, SSID and channel are required.)
- After you have installed the software from the supplied CD-ROM to your PC, before executing "Easy Connection" using Image Express Utility, visit our website to update the information about Image Express Utility and its related software. Software can be downloaded from our website at no charge.
- Easy Connection is available on Windows 2000 Professional, Windows XP Professional and Windows XP Home Edition. (Using the Easy Connection mode on Windows XP Tablet PC Edition requires the Image Express Utility version 1.01.0004 or later.)
- Easy Connection is available only when both PC and projector use the NEC optional wireless cards.
- Easy Connection is not available on Dynamic Image Utility included on the supplied CD-ROM.

### Supported Projectors

The following NEC projectors will be supported:

- **GT6000/GT5000**
- **MT1075**
- **MT1065/MT1060/MT860**
- **LT260/LT240/LT220**
- **LT260K/LT240K**
- **WT600**
- **VT770**

*1 The GT6000/GT5000 comes standard with a LAN port (RJ-45).

*2 The whole functions of Image Express Utility 1.0 and certain functions of Dynamic Image Utility are not available on the VT770 because the VT770 does not support network connections.
# Operating Environment

| Supported Equipment | IBM PC/AT compatible computers  
|                     | • CD-ROM drive a requirement (at time of installation) |
| CPU                | Pentium MMX processor or higher a requirement  
|                    | Pentium III 800 MHz or higher recommended |
| Memory             | For Windows XP  
|                    | • 128 MB or more a requirement  
|                    | • 192 MB or more recommended  
|                    | For other operating systems  
|                    | • 64 MB or more a requirement  
|                    | • 128 MB or more recommended  
|                    | * More memory may be necessary when other applications are run at the same time. |
| Network Environment (when used) | A LAN that supports TCP/IP or a wireless LAN environment is a requirement.  
| | • For information on supported LAN cards, visit:  
| | http://www.nec-pj.com/  
| | • For wireless LAN connection, use NEC optional wireless LAN card (SWL-2100N-N*).  
| | * Last digit of the model code varies depending on which country you live in. For more information, visit the above Website. |
| Supported OS | Windows 98  
| | Windows 98 Second Edition  
| | Windows Me  
| | Windows 2000 Professional  
| | Windows XP Home Edition  
| | Windows XP Professional, Windows XP Tablet PC Edition  
| | * Microsoft Internet Explorer 5.01 or higher is required for the aforementioned environments.  
| | * Does not support Windows power-saving function. |
| Resolution | 1024 dots x 768 lines recommended  
| | ( 800 dots x 600 lines recommended for LT220 and MT860 ) |
| Screen Colors | High Color (15 bit, 16 bit)  
| | True Color (24 bit, 32 bit) |
2. Equipment Connections and Settings

When Using a Network Environment

What Can Be Accomplished

- Using Image Express Utility 1.0, the screen image displayed by the personal computer can be sent to the projector and then projected to a screen.
- Using Dynamic Image Utility 2.0, a picture or slide can be sent to the projector and then projected to a screen.
- Using the projector control function of Dynamic Image Utility 2.0 allows operations to be performed from the personal computer which include switching the projector power on/off, signal selection, and adjustment of the picture quality.

Equipment to Be Prepared

- Projector (This unit)
- Personal computer
- LAN card

Settings at the Projector Side

Preparation:

1. Insert the LAN card into the PC Card slot of the projector. (“Inserting and Removing a PC card” in the user’s manual)
2. Switch on the projector power and project to the screen. (“Projecting an Image” in the user’s manual)
3. Switch to the advanced menu. (“Menu” in the User’s manual)

Press the MENU button.
The menu will be displayed.

Use the SELECT ▼ button to align the cursor with [Projector Options], then press the ENTER button.
The sub menu will be displayed.

Use the SELECT ▼ button to align the cursor with [LAN Mode], then press the ENTER button.
The LAN mode setting screen will be displayed.

Set the various items.
See "Using On-Screen Menu" → "Menu Description & Functions" → "Setting LAN Mode" in the user’s manual on the supplied CD-ROM for information about the various items.

NOTE
When switching the power of the projector on/off with the projector control function, please set [Projector Options] → [Setup] → [Page 4] → [Idle Mode] to "On".
Settings at the Personal Computer Side
Perform the regular LAN connections settings according to the instruction manual of the LAN card (adapter).
There are no special settings to be made in the connections with the projector.

When Making Connections with Serial Cable or USB Cable(*)
* USB cable connection is not supported by the LT260, LT240, LT220 and VT770.

What Can Be Accomplished
• Using Dynamic Image Utility 2.0, a picture or slide can be sent to the projector and then projected to a screen.
• Using the projector control function of Dynamic Image Utility 2.0 allows operations to be performed from the personal computer which include switching the projector power on/off, signal selection, and adjustment of the picture quality.

[For Connections with USB Cable]

Equipment to Be Prepared
• Projector (This unit)  • Personal computer  • USB cable (included with the projector)

Connection at the Projector Side
Plug the B type connector of the USB cable to the USB port [PC] (type B).

Connection at the Personal Computer Side
Plug the A type connector of the USB cable to the USB port [PC] (type A).

[For Connections with Serial Cable]

Equipment to Be Prepared
• Projector (This unit)  • Personal computer
• Serial cable (Optional CA03D for LT260/LT240/LT220/LT260K/LT240K/WT600 and a commercially available RS-232C cross cable for GT6000/GT5000, MT1075, MT1065/MT1060/MT860 and VT770)

Connection at the Projector Side
Plug the serial cable into the PC CONTROL connector. (“Terminal Panel Features” and “PC Control Connector” on User’s manual)

Connection at the Personal Computer Side
Plug the serial cable into the (RS-232C) serial connector.

NOTE: When switching the power of the projector on/off with the projector control function, please set [Projector Options]→[Setup]→[Page 4]→[Idle Mode] to “On”.
For GT6000/GT5000, MT1075, MT1065, MT1060 and MT860, set [Idle Mode] to “On” only when the projector is connected with a USB cable.
3. Software Installation

NOTE
• Windows XP operations will be described in examples given here.
• If you have NEC Projector User Supportware (Dynamic Image Utility 2.0 and Image Express Utility 1.0) already installed on your computer, before installing the new NEC Projector User Supportware, first uninstall the current one.

■ Installation
Dynamic Image Utility 2.0 and Viewer PPT Converter 2.0 will all be installed together. The two programs cannot be installed individually.
After that, install Image Express Utility 1.0.

Preparation:
Start Windows.
If Windows has already been started, please exit all running application software. The installation may not be completed properly unless all software has been exited.

1 Set the supplied CD-ROM in the CD-ROM drive.
The "Startup" screen will appear.

Reference
Should the "Startup" screen not appear...
1) Click [Start].
2) Click [Run (R)]. The [Run] screen will appear.
3) Enter the CD-ROM drive name (e.g., "Q: ") and then "SETUP.EXE" to [Open (O)].
4) Click [OK]. The "Startup" screen will appear.

2 Click "Please read this first" to open NEC Projector User Supportware Readme File.

3 After reading the readme, click [x] on the window.
The window of the readme file will be closed.

4 Click "Installing the Dynamic Image Utility 2.0".
The installation will start automatically and the “Welcome” screen will appear.

5 Click [Next >] at the "Welcome" screen.
The "End User License Agreement" screen will appear.
• Please carefully read the contents of the "End User License Agreement".
If you agree, click [Yes].
- If you do not agree, please click [No] and exit the installer.

Now, follow the operations described in the screen messages.
- Viewer PPT Converter 2.0 will be installed together at the time of installation of Dynamic Image Utility 2.0.
- If a message prompting you to restart the system will appear, restart the Windows.

Click “Installing the Image Express Utility 1.0”
- Repeat the steps 5 to 7 above stated.

Please remove the CD-ROM from the CD-ROM drive when the installation is completed.

Reference
- To cancel the installation of the supplied software part way through the installation, click [Cancel] and follow the instructions of the dialog box.

Uninstalling
Dynamic Image Utility 2.0 and Viewer PPT Converter 2.0 will all be uninstalled together. The two programs cannot be uninstalled individually.
Image Express Utility 1.0 will be uninstalled.

Click [Start] on Windows.

Click [Control Panel].
The "Control Panel" screen will be displayed.

Double click [Add or Remove Programs].
The "Add or Remove Programs" screen will appear.

Click "Dynamic Image Utility 2.0" from the list.
To uninstall Image Express Utility 1.0, click “Image Express Utility 1.0” from the list.

Click [Change/Remove . . . ].
A message “Are you sure you want to completely remove the selected application and all of its components?” will be displayed.

Check the message and click [Yes].

Now, follow the operations described in the screen messages.
When the uninstall procedure is completed, there will be a return to the "Add or Remove Programs" screen.

Click [OK].
There will be a return to the "Control Panel" screen.
4. Starting/Exiting the Software

NOTE: Windows XP operations will be described in examples given here.

Dynamic Image Utility 2.0

Start the Software

Preparation:
Install the software on the personal computer from the supplied CD-ROM. (Page 9)
The software cannot be started from the supplied CD-ROM.

From the [Start] menu click [All Programs] → [NEC Projector User Supportware] → [Dynamic Image Utility 2.0].
Dynamic Image Utility 2.0 will start.

Reference
- By selecting a PowerPoint file with Dynamic Image Utility 2.0 and clicking [Tools] → [Converting PowerPoint file], the function equivalent to Viewer PPT Converter 2.0 can be executed.
- Image Express Utility 1.0 can be started by clicking [Tools] → [Image Express Utility 1.0 Start] of Dynamic Image Utility 2.0.

Display Help

Preparation:
Please start Dynamic Image Utility 2.0.

1. Click [Help] on the menu bar.
The [Help] pull-down menu will appear.

2. Click [Help...F1].
The [Help] screen will appear.

Exit the Software

1. Click [File] on the menu bar.
The [File] pull-down menu will appear.

2. Click [Exit].
Dynamic Image Utility 2.0 will close.
[to be filled]

4. Starting/Exiting the Software

■ Image Express Utility 1.0

● Start the Software

Preparation:
Install the software on the personal computer from the supplied CD-ROM. (Page 9)
The software cannot be started from the supplied CD-ROM.

1. From the [Start] menu click [All Programs] → [NEC Projector User Supportware] → [Image Express Utility 1.0].
Image Express Utility 1.0 will start.

Reference
• Image Express Utility 1.0 can also be started from the [Tools] → [Image Express Utility 1.0 Start] menu of Dynamic Image Utility 2.0.

● Display Help

Preparation:
Please start Image Express Utility 1.0.

1. Click the [ ] or [ ] icon of the Windows screen task tray.
The main menu of Image Express Utility 1.0 will appear.

2. Click [Help].
The Help screen will appear.

● Exit the Software

1. Click the [ ] or [ ] icon of the Windows screen task tray.
The main menu of Image Express Utility 1.0 will appear.

2. Click [Exit].
Image Express Utility 1.0 will close.
5. Troubleshooting

• In this chapter, the software names have been abbreviated as follows:
  Dynamic Image Utility 2.0 to DIU 2.0, Viewer PPT Converter 2.0 to PPTC 2.0, and Image Express Utility 1.0 to IEU 1.0.

<Problem> Installation does not complete normally.

<td>Are the TCP/IP settings (e.g., IP address, sub net mask, etc.) of the personal computer and the projector correct?</td>
<td>Set only the network card (NIC) that is connected to the projector to &quot;Valid&quot;. For a network card that is not connected to the projector, click the network card name under &quot;Control Panel&quot; → &quot;System&quot; → &quot;Hardware&quot; → &quot;Device Manager&quot; → &quot;Network Adapters&quot; and then click [Properties (R)] and set the device usage to &quot;Not used&quot;.</td>
</tr>
<tr>
<td>Are more than one network cards (NIC) being used with the same computer?</td>
<td></td>
</tr>
</tbody>
</table>
**<Problem>** Sometimes it takes a long time for screen transmission from the personal computer to the projector. (IEU 1.0)

<table>
<thead>
<tr>
<th>Check Points</th>
<th>Countermeasures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transmission time may be long depending on the image pattern.</td>
<td></td>
</tr>
<tr>
<td>When screens are sent to multiple projectors simultaneously, a larger number of projectors will result in longer transmission times.</td>
<td></td>
</tr>
<tr>
<td>The transmission time may vary depending on the network environment.</td>
<td></td>
</tr>
<tr>
<td>The transmission time may vary depending on the performance of the personal computer as well as other application software that is running at the same time.</td>
<td></td>
</tr>
<tr>
<td>Transmission time will be longer when the resolution of the personal computer and that of the projector differ since there will be an increase in resolution conversion processing.</td>
<td></td>
</tr>
</tbody>
</table>

We recommend that the resolution of the personal computer and that of the projector except GT6000 be set to the same setting value. The resolution of GT5000, MT1075, MT1065, MT1060, LT260, LT240, LT260K, LT240K and WT600 is 1024 x 768 dots. The resolution of LT220 and MT860 is 800 x 600 dots.

**<Problem>** Cannot follow the screen switching processing of the PowerPoint slide show, etc. (IEU 1.0)

<table>
<thead>
<tr>
<th>Check Points</th>
<th>Countermeasures</th>
</tr>
</thead>
<tbody>
<tr>
<td>Smooth screen switching processing or animation effects cannot be followed because in Image Express Utility 1.0, the screen condition of the personal computer is sent to the projector at a fixed time interval.</td>
<td></td>
</tr>
<tr>
<td>Use the software with &quot;the PowerPoint screen switching effects, animation effects, and other settings set to &quot;None&quot;.</td>
<td></td>
</tr>
</tbody>
</table>

**<Problem>** Image size at the time of transferring slide show is different from the one at the normal time. (PPTC2.0)

<table>
<thead>
<tr>
<th>Check Points</th>
<th>Countermeasures</th>
</tr>
</thead>
<tbody>
<tr>
<td>You have started Image Express Utility 1.0 after PowerPoint. This may cause image size differences between the size of a slide show image transferred with PowerPoint add-in function and the normal size.</td>
<td></td>
</tr>
<tr>
<td>Restart PowerPoint.</td>
<td></td>
</tr>
</tbody>
</table>
