

MultiPresenter Stick

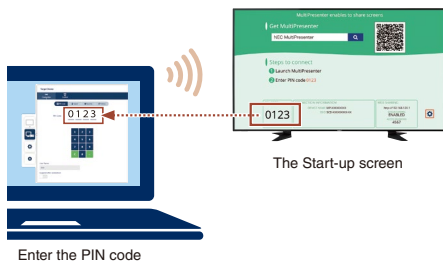

MP10RX

Wireless Presentation solution for NEC Projectors and Displays, supporting multiple simultaneous connections on Win/MAC/iOS/Android™.

Delivering Genuine Benefits

Ease-of-Use

Simply use the wireless auto connect + PIN to mirror your Full-HD content to large format displays and projectors.

Bring Your Own Device (BYOD)

Connect your own device supporting Win, MAC, Android and iOS operating systems.

Serve your Guests with Wireless Presenting

Use wireless plug & play USB token without installing software on presenting devices.

Improve your Productivity & Teamwork

Empower meeting participants by connecting up to 12 mobile devices. All wirelessly connected devices can share content while switching presenter on-the-fly.

Command Attention

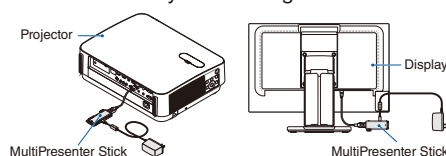

Stand out from the crowd and draw attention by broadcasting your presentation to 4 MultiPresenter linked large format displays and projectors.

Share with your Audience

Follow presentations on your own device using web- and file-sharing while creating individual notes.

Protect your Investment

Bundle NEC projectors and large format displays with MultiPresenter, adding wireless collaboration to your meeting rooms.

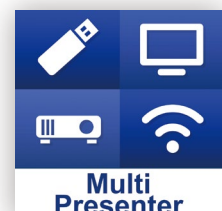

MultiPresenter Stick MP10RX

HDMI® HIGH-DEFINITION MULTIMEDIA INTERFACE

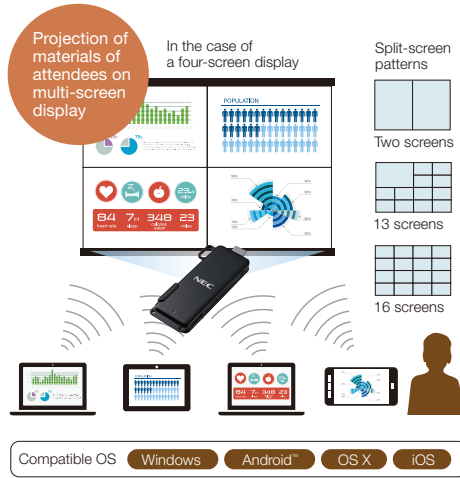

Actual size 117 mm x 47 mm x 14 mm

Advanced Networking Capabilities

Multi-screen Projection Function*1

The multi-screen projection function allows for the sharing of screens of multiple devices on various split-screen displays. Display information from up to 50*2 PCs, tablet PCs, smart phones, and other network connected devices on a multi-screen display of up to 16 screens. Easily share screens and information regardless of device or operating system.

*1: PCs, Smart phones and tablets require the download and installation of our MultiPresenter software.
 *2: The connection of 50 devices to the network requires construction of a wireless LAN environment, such as the use of a separate access point.

Web Sharing Function

Without the need for exclusive software, it enables you to share images and files between the MultiPresenter Stick and computers in the same network by accessing the web server of the MultiPresenter Stick utilizing the web browser.

Specifications
